PREFACE.

IN introducing this work to the Motor and Allied Industries, the Society of Motor Manufacturers and Traders believe they are meeting a demand which exhaustive enquiries have shown to be very real and ever increasing.

The number of Telegram Codes of a general nature, and the wide circulation they enjoy, give evidence of the necessity of an economical medium of telegraphic correspondence for all engaged in Overseas business; but in a highly technical Industry covering a wide area, they offer but occasional help, and the facilities and technique that are at the disposal of the present-day Code Expert are called more and more for direction into specialised and particular channels.

The present work has been compiled in strict accordance with the rules governing the use of Code Words, which allow any pronounceable group of ten letters to be sent at the cost of One Code Word.

Every item in the Code is therefore indicated by a Half Word of five letters, thus allowing any two Half Words representing two items to be combined for one complete Code Word of ten letters.

Great care has been exercised in the selection of the Half Words employed. Each being pronounceable itself, it follows that two combined must form a full word that is also pronounceable. Each differing from each by at least two letters ensures that a mutilation in transmission can hardly pass undetected.

The items that they indicate are consequently made on the same principle, viz., the ability to combine

one with another to give jointly the point of information desired by the full Code Word. Thus each Half Word, giving but a portion of what may be desired to express, has at its disposal—potentially—the whole of the remainder of the Code to complete it.

As there are over 32,000 items in the Code, it follows that over one thousand million full Code Words with their translation may be expressed ($32,000 \times 32,000 = 1,024,000,000$).

Apart from the enormously wide range thus provided by this system is the additional advantage of the greater ease and variety of expression that it offers by allowing the user to frame his message in his own language and code it practically verbatim.

In no case does this work seek to abrogate to itself the functions of a Private Code (where all the technique employed is directly centred), nor does it claim to be a Lexicon or Encyclopaedia of every article, item or term that could be considered as belonging to the Motor and Allied Industries, but it is designed to be comprehensive of all such matters concerning these Industries—Technical, Commercial and General—as may be likely to be required for purposes of Overseas Cabling.

Proprietary terms are rigorously excluded, but for these and the specialised items of information required by any given circle of correspondents, provision is made by the blank pages of Half Word Ciphers at the end of Part I., while in Part III. an opportunity is given for incorporating any Catalogue or List in its operation. By this threefold method it is hoped that it may become the Standard Work for the Motor Industry, for which it has been designed.

In conclusion, the Compiler desires to express his gratitude for the valuable help and technical guidance he has received from Engineers whom he has consulted.

W. M. S.

August, 1920.

NOTES AND INSTRUCTIONS.

THE contents of this Code are divided into three principal Parts, viz. (I.) **Phrases**, etc., relating to matters of Technical, Commercial, and General information ; (II.) **Tables** giving Dates, Numerals, Measurements, Money, etc. ; (III.) **the use of the Code Numbers** for the incorporation of Catalogues, etc., in the operations of the Code.

The **Ciphers** of the Code are on the basis of **Half Code Words of five letters**, allowing any two from any part of the Code to be combined and sent for one full pronounceable Code Word of ten letters. (An odd Half Word is, of course, charged as a Full Word.)

The **Phrases**, etc., are arranged in **strict alphabetical order of Subject** throughout, and to refer to the Code turn to the Subject of the phrase required.

The fullest **Cross-references** are given from one Subject heading to another where necessary in order to avoid any confusion that may result through a difference of opinion as to what constitutes the Subject of any given item, *e.g.*, "**Accelerator Spring**" will be found under the Subject of "**Accelerator**," but should it be looked for under "**Spring**," the Cross-reference will be found, "**See also Accelerator.**" It is therefore advisable in referring to any Subject to look through any Cross-references that may appear at its heading.

A word or words appearing in brackets (—) should be ignored if not required to complete the message. This form of amplifying a phrase has been extensively used in this Code to enable Measurements, Voltage, etc., etc., to be added when necessary. (See Examples Nos. 3 and 4.)

Measurements are provided in the Measurement Table, Part II., for Feet and Inches and for Millimetres by the use of the **Numeral Table**, which is also open for the expression of any form of quantity (Dollars, Francs, Millimetres, etc.), that may be required. Most frequently the form of numeral is understood by the context of the message, as in the case of millimetres, being indicated by the suggestion of measurements in brackets (see "**Tyres**" in Part I., and also Example No. 3), but where there can be any doubt as to the exact form of numeral it must be indicated by another Half Word from Part I., thus 1500 = "scusu," dollars = "ecses" (scusuecses).

Decimals of two points are provided in the Decimal Table, Part II., and by a Half Word from the Numeral and Decimal Table respectively, as explained by a note at the head of the latter Table.

The **Code Numbers** given in the left-hand column may be put to a variety of uses, of which the **ability to indicate items from a catalogue or list numbered for the purpose** in the same form as the Code Numbers in the Code is of great importance (see Part III.). Any catalogues so numbered and entered in the space provided for them in Part III. virtually become a supplement of the Code, and can be used freely with it on a very high scale of economy.

Items in catalogues usually give a very full description, including measurements, weights, price, etc., all of which by this method can be indicated for one Half Word (see Example 4, where, if the Accumulators had been referred to through a numbered catalogue, one Half Word, preceded by a Half Word from Part III., would have done the work of the last three full Code Words). (For full Instructions and Example, see Part III.)

It is important that the Code Words should be written or typed on the telegraph form very distinctly to minimise the chance of an error in transmission, which is often due as much to illegible writing as to a mistake of an operator.

It is almost impossible that an error in a telegram should pass undetected, as the construction of the Ciphers is such that the mutilated Half Word would not appear.

In such cases a repetition of the telegrams should be requested or the sender telegraphed that a certain word in his telegram is unintelligible and should be repeated. Phrases are provided for this purpose under the subject of "Telegram."

A careful perusal of these Instructions, a study of the Examples, and a little practice in the working of the Code will give that familiarity which is necessary to obtain the best results from its operations.

INDICATOR OF THIS CODE

MOTOG

Should there be any reason to suppose that a recipient of a telegram by this Code having others in use should be in doubt as to which Code he has to refer, commence the message with the Half Word—

"MOTOG," which being interpreted reads :

"This telegram is coded by the Motor Trade Telegram Code."
(See Example No. 1.)

MESSAGE :

This telegram is coded by the Motor Trade Telegram Code. Ship by first steamer 200 Pistons complete with Rings, Gudgeon Pins, 50 sets of Differential Crown Wheels, Differential Bevel Pinions, 300 each of Exhaust Valves, Exhaust Valve Springs, Exhaust Valve Spring Keys, 5 gross assorted Copper and Asbestos Flange and Circular Washers. Referring to your telegram of 25th, remit by telegraphic transfer £500; travelling expenses very heavy but sound business anticipated provided demonstration can be given and proves satisfactory.

10177	fadcy	Rubber hose (— diam.)
10178	fadmi	Water hose (— diam.)
10179	fadok	HOSPITAL(S)
10180	fadso	Taken to hospital.
10181	fadyu	HOT.
10182	faeda	HOUR(S). See also AMPERE, MILE.
10183	faeeb	Any hour.
10184	faehe	— hours per day.
10185	faeif	Every hour.
10186	faell	„ few hours.
10187	faeol	(A) few hours.
10188	faero	For — hours.
10189	faeur	Half an hour.
10190	faexu	(At —) per hour.
10191	fafay	Quarter of an hour.
10192	fafca	Several hours.
10193	fafec	Working hours.
10194	fafge	HOUSE(S) <i>or to House</i>
10195	fafig	Banking house(s)
10196	fafki	Commercial house(s)
10197	fafom	Financial house(s)
10198	fafus	Manufacturing house(s)
10199	fafwu	Motor house(s)
10200	fagaz	Power house(s)
10201	fagba	Shipping house(s)
10202	faged	Housed.
10203	fagfe	HOUSING(S). See also AXLE, BEARING, CLUTCH, COVER, LAMP, SPRING.
10204	fagji	HOVER(S) <i>or to Hover</i>

Nos.	(Half) word.	(Half) PHRASE.
10205	fagon	Hovered.
10206	fagpo	Hovering.
10207	fagut	HOW. See also HE and other pronouns.
10208	fagvu	HOWEVER.
10209	fagyx	HUB(S). See also BRAKE, CLUTCH, CONE, PROPELLER, RING, SPINDLE.
10210	fagzy	Ball bearing hub(s) (drilled for — spokes of — gauge)
10211	faide	Detachable ball bearing hub(s) (drilled for — spokes of — gauge)
10212	faihi	Coaster brake hub(s) (drilled for — spokes of — gauge)
10213	faino	Driving hub(s)
10214	faitu	„ „ „ inside.
10215	faixy	„ „ „ outside.
10216	faiza	Hub end(s)
10217	fajac	Inner end(s) of hub(s)
10218	fajce	Outer end(s) of hub(s)
10219	fajeg	Hub extractor(s)
10220	fajgi	„ flange(s)
10221	fajik	Front hub(s) (drilled for — spokes of — gauge)
10222	fajmo	Hub gear(s)
10223	fajsu	Inner hub(s)
10224	fajwy	Hub key(s)
10225	fajya	Outer hub(s)
10226	fakad	Hub pin(s)
10227	fakbe	Rear hub(s) (drilled for — spokes of — gauge)
10228	fakeh	Two-speed hub(s) (drilled for — spokes of — gauge)
10229	fakfi	Three speed hub(s) (drilled for — spokes of — gauge)
10230	fakll	Turned hub(s)
10231	faklo	Free wheel hub(s)
10232	fakor	HULL(S)
10233	fakru	Beam(s) of hull(s)
10234	fakux	Hull belting.
10235	fakvy	Copper fastened hull(s)
10236	fakxa	Depth of hull(s)
10237	fakyb	Draught of hull(s)
10238	fallm	Length of hull between perpendiculars.
10239	falko	„ „ „ at water line.
10240	falos	Painted hull(s)
10241	faluy	HUMID(ITY)
10242	falwa	(Per) HUNDREDWEIGHT(S) (cwt.(s.))
10243	falye	HUNG. See also HANG.
10244	famaf	HURRICANE(S). See also GALE, LAMP.
10245	famdi	HURRY(IES) <i>or to Hurry</i>
10246	famej	No hurry (or not to hurry).
10247	famin	Hurry up with—
10248	famjo	Hurried.
10249	famot	Hurrying.
10250	fampu	HURT(S) <i>or to Hurt</i>
10251	famty	Badly hurt.

Nos.	(Half) word.	(Half) PHRASE.
10252	famuz	Not hurt.
10253	famva	Slightly hurt.
10254	famyd	Hurting.
10255	famze	HYDRAULIC. See also DRIVE.
10256	fanag	HYDROGEN. See also CYLINDER.
10257	fanci	HYDROMETER(S)
10258	fanek	Acid hydrometer(s)
10259	fansy	Bead hydrometer(s)
10260	fanye	Gasolene hydrometer(s)
10261	faobi	HYDROPLANE(S)
10262	faoho	HYGIENIC.
10263	faonu	I. See also CAN, COULD, HAVE, and other auxiliary verbs.
10264	faory	After I.
10265	faota	As I.
10266	faoub	Before I.
10267	faoxe	But I.
10268	fapem	If I.
10269	fapgo	How I.
10270	fapmu	Unless I.
10271	fapow	Until I.
10272	fapsa	What (which) I.
10273	fapuc	When I.
10274	fapwe	Where I.
10275	fapyg	Why I.
10276	farak	IDEA(S)
10277	faris	Any idea(s)
10278	farku	General idea (of)
10279	faroy	Good idea(s)
10280	faryl	Main idea.
10281	fasal	New idea(s)
10282	fasdo	No idea.
10283	fasep	The same idea.
10284	fasit	What idea(s)
10285	fasju	IDEAL(LY)
10286	fasny	IDENTICAL(LY)
10287	fasoz	IDENTIFICATION. See also LETTER.
10288	faspa	IDENTIFY(IES) <i>or to Identify</i>
10289	faste	Identified.

(See also Part III.)

For any Decimal Currencies, Measurements, etc., in conjunction with a Half Word from Part I. specifying the Currency required (Dollars, Francs, etc.) if not otherwise understood.

If a whole number is required with two points of decimals other than is provided in this Table the same may be taken from Numeral Table and combined with the two decimal points required from this Table, thus :—156.32 = ruifopikyz.

For expressing higher numbers with two decimal points see Note
at head of Table.

NOTE.—If it is required to give a H.P. otherwise than those in this Table the same may be taken from Numeral Table, preceding the Half Word by the Half Word indicating "Horse-power" from Part I. unless the context renders it unnecessary.

THE LITERATURE OF THE SCIENCES AND ENGINEERING

On our shelves is the most complete stock of technical, industrial, engineering and scientific books in the United States. The technical literature of every trade is well represented, as is also the literature relating to the various sciences, both the books useful for reference as well as those fitted for students' use as textbooks. A large number of these we publish and for an ever increasing number we are the sole agents.
